

VON DER PLANUNG BIS ZUR AUSFÜHRUNG. WIR ÜBERNEHMEN SÄMTLICHE ARBEITEN

Für eine perfekte Integration Ihres Naturpools in Ihre Gartenanlage

Als anerkannter Ausbildungsbetrieb mit viel Erfahrung gestalten und pflegen wir seit 1992 mit großer Leidenschaft für unseren Beruf die Gärten unserer Kunden. Mit Kreativität, fachlichem Können und einem großen Einfühlungsvermögen für Ihre Vorstellungen gestalten wir für Sie Ihren ganz persönlichen Naturpool.

Ein eigenes Ökosystem mit geringem Pflegaufwand

Sobald der Naturpool angelegt ist, wird er in kürzester Zeit von unserer heimischen Fauna und Flora besiedelt. Dank des ökologischen Gleichgewichts ist der Pflegeaufwand gering. Dennoch sollte der Eintrag von Laub, Samenflug und Ähnlichem regelmäßig entfernt werden.

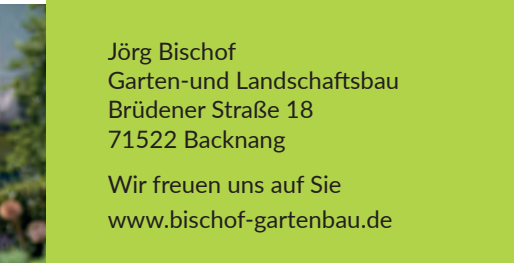

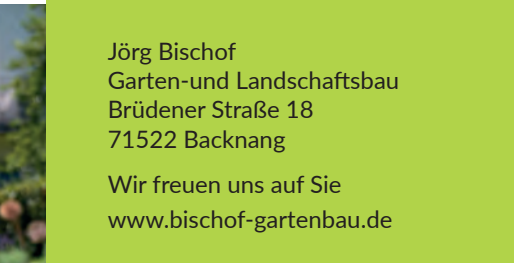

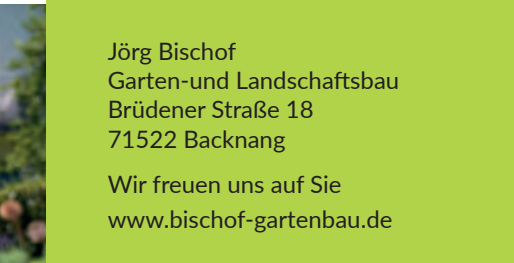

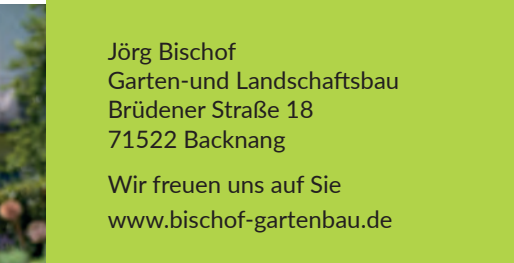

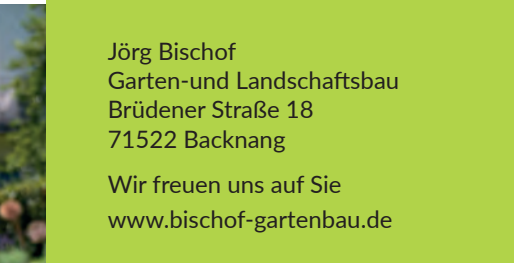

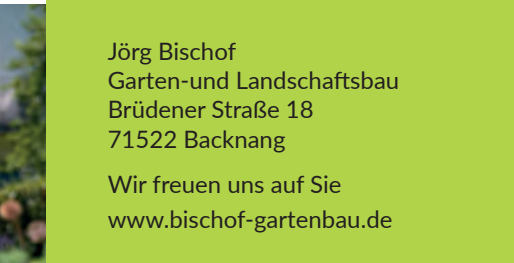

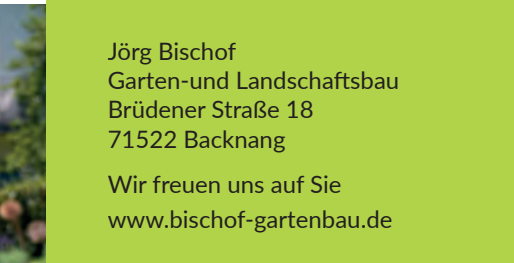

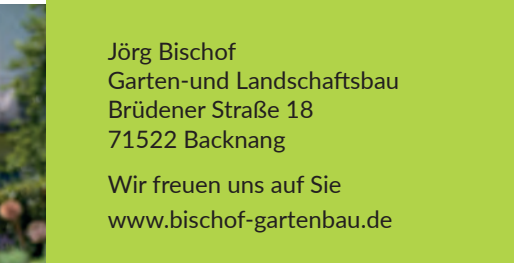

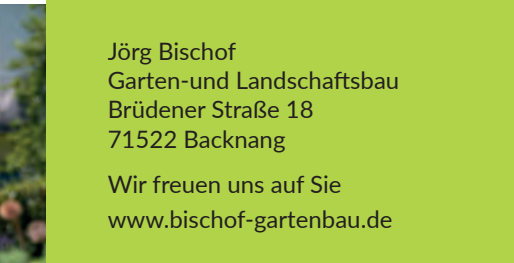

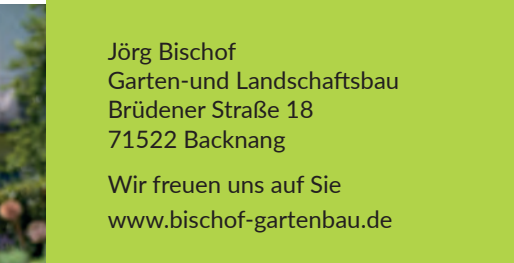

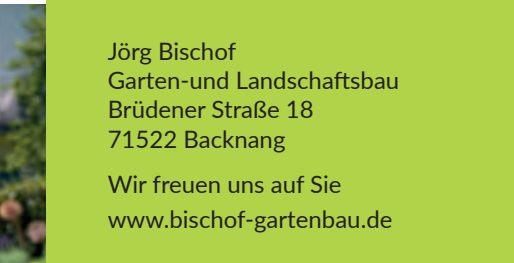

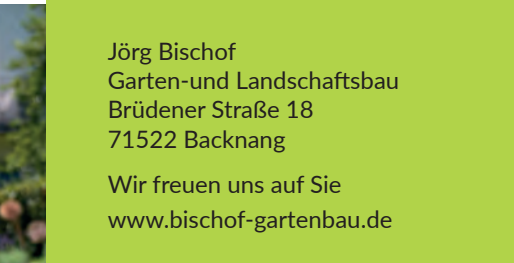

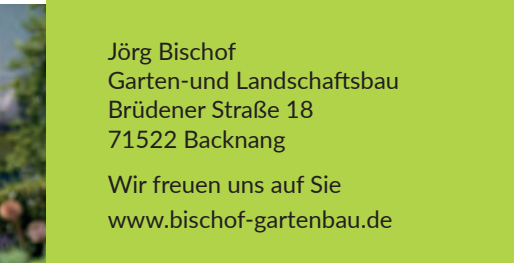

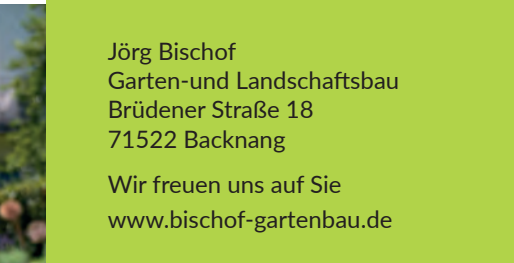

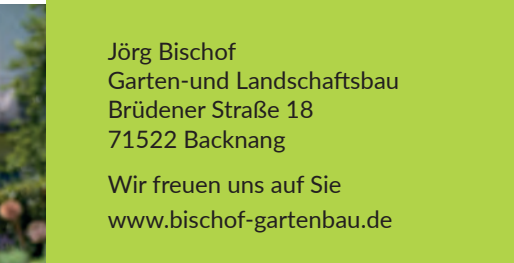

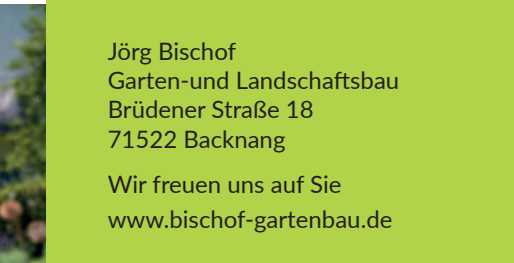

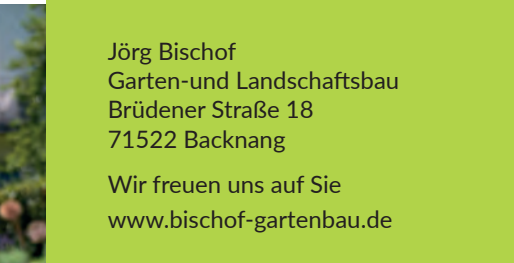

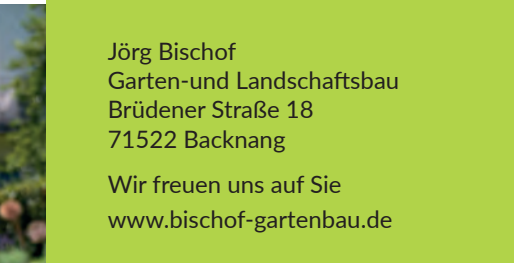

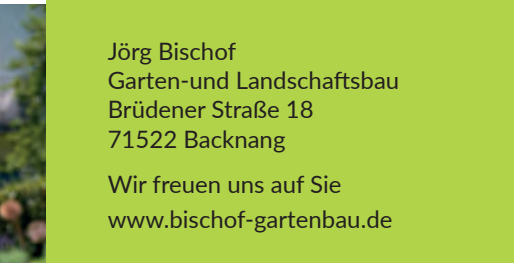

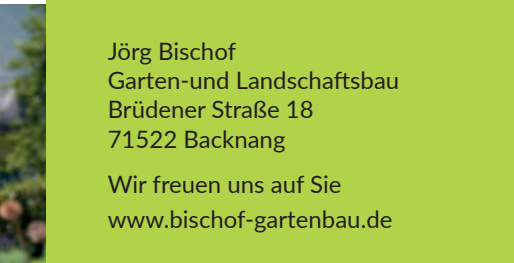

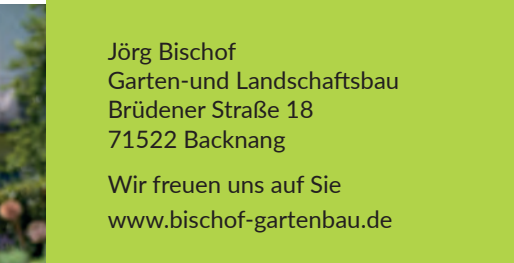

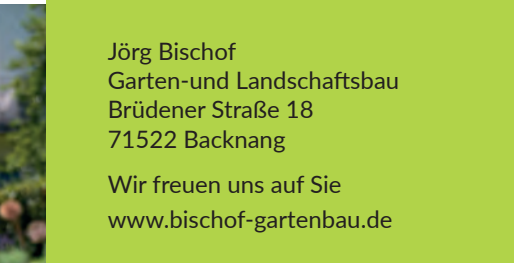

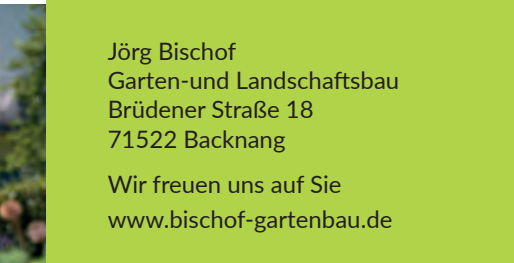

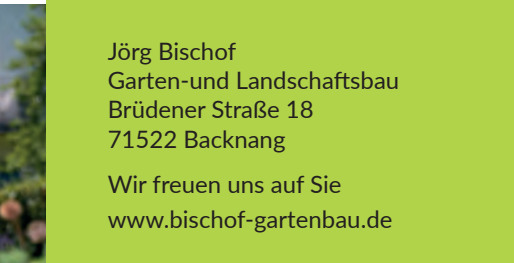

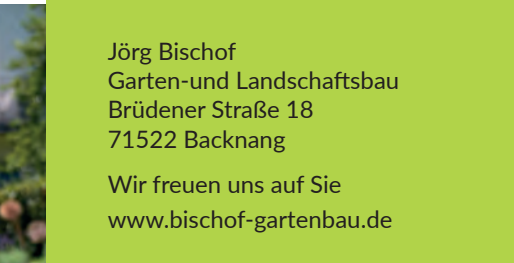

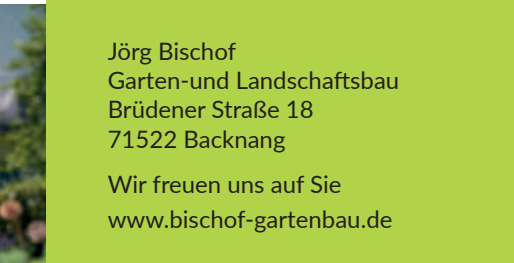

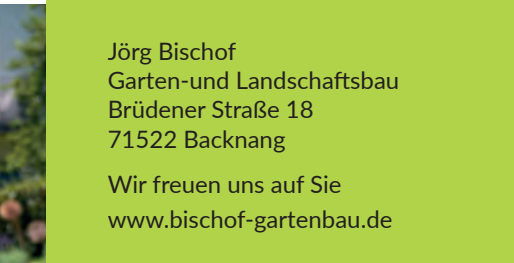

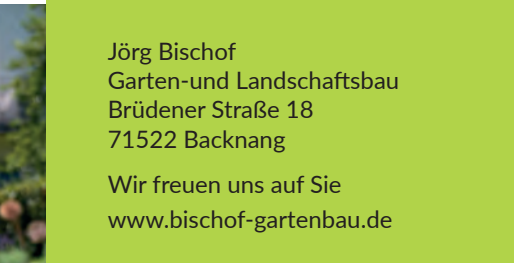

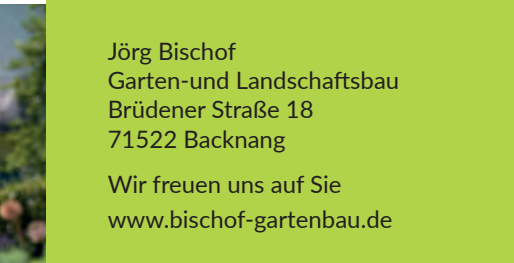

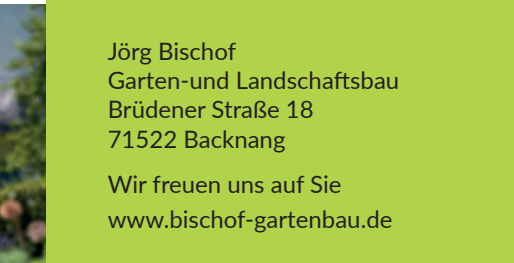

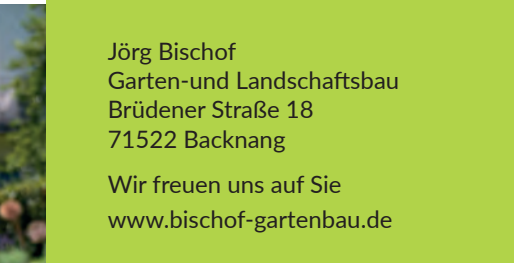

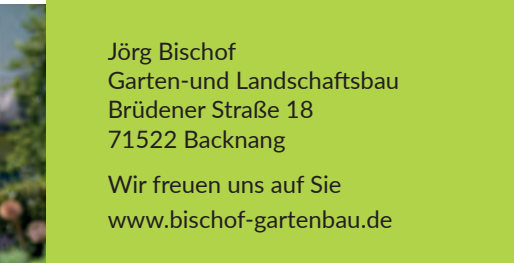

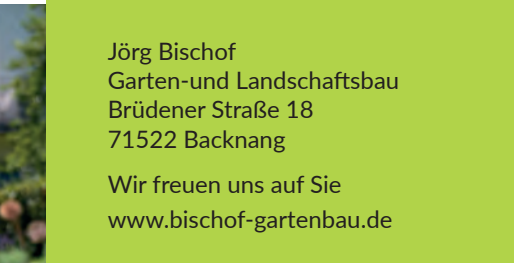

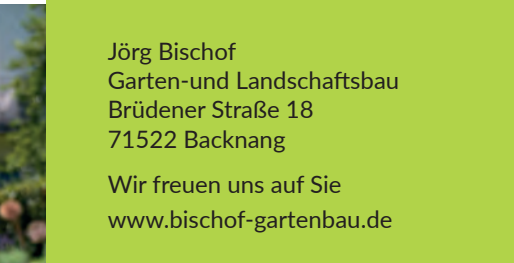

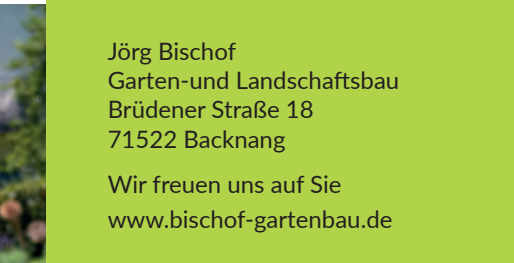

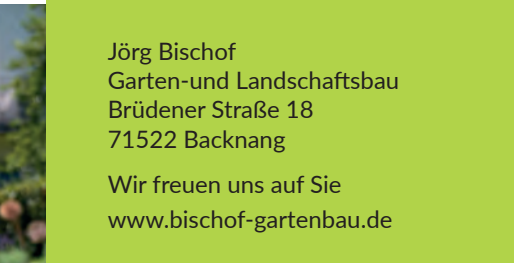

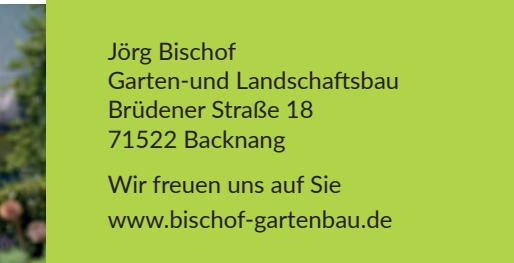

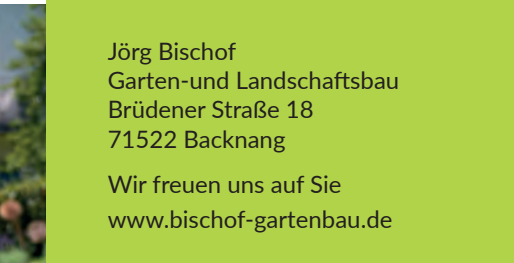

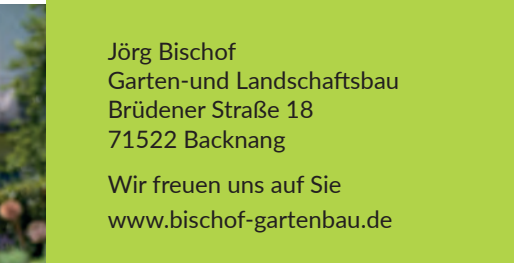

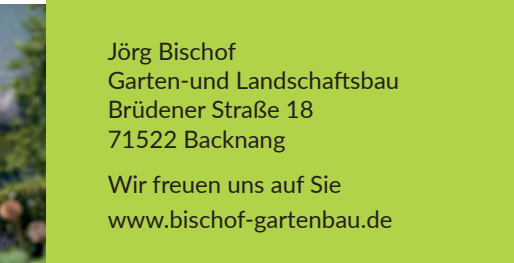

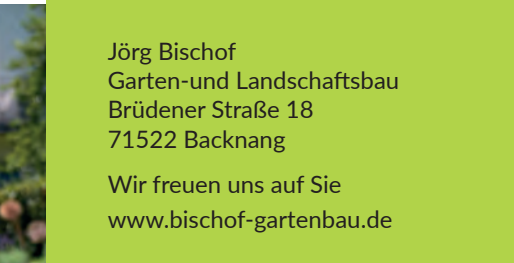

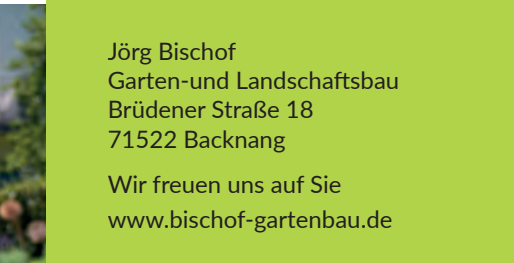

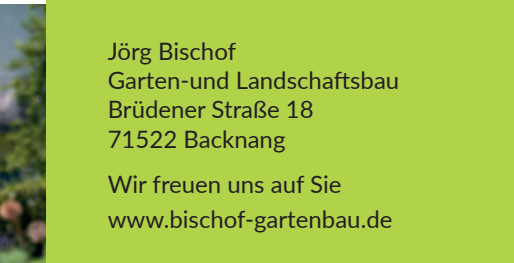

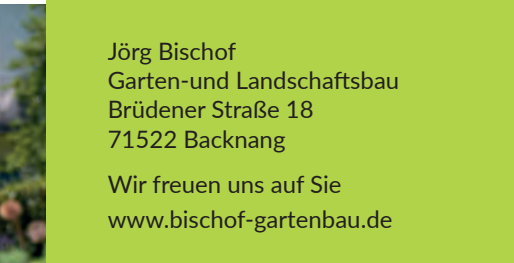

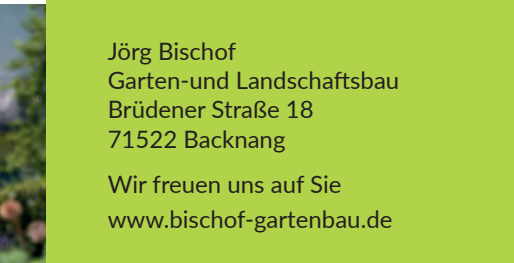

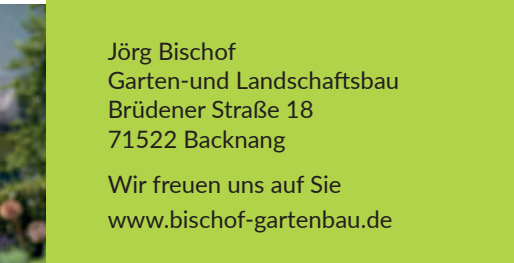

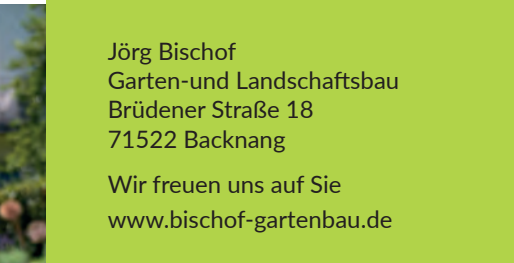

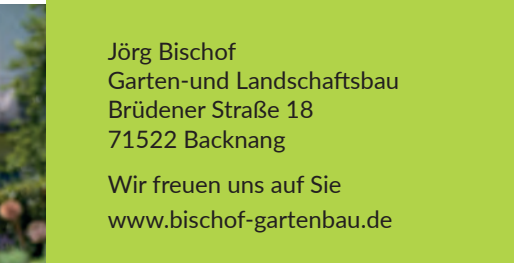

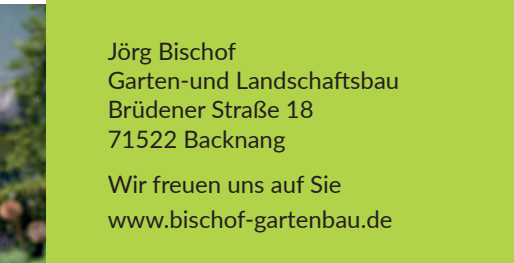

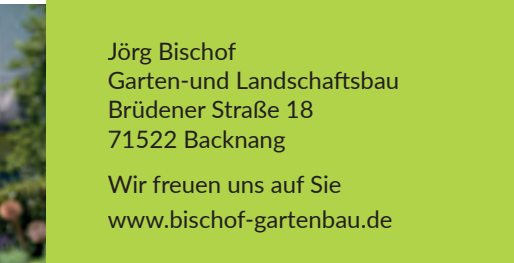

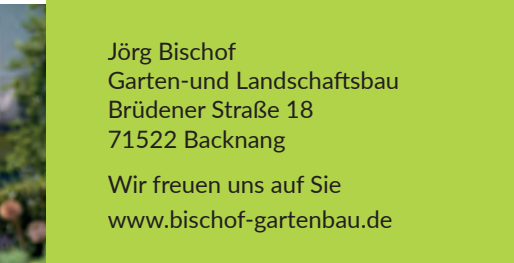

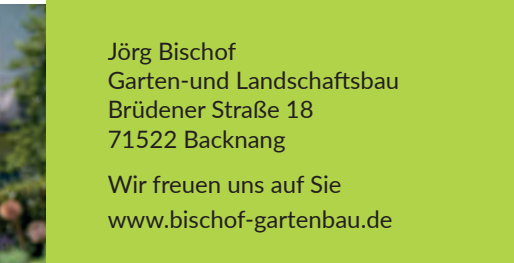

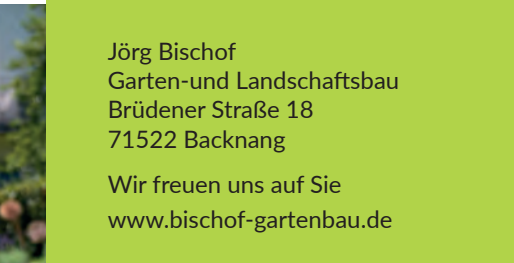

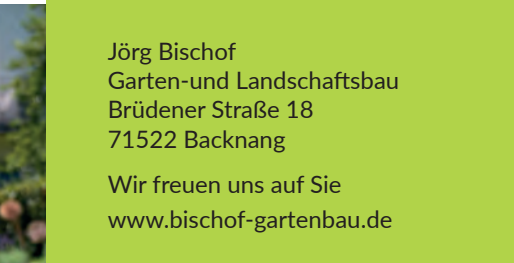

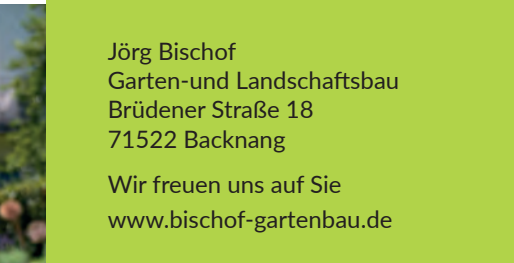

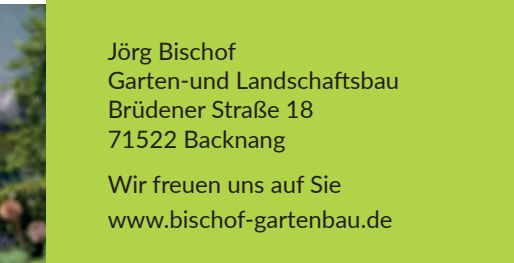

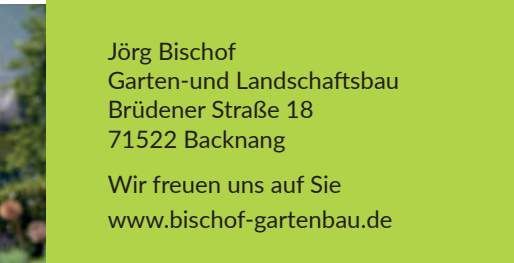

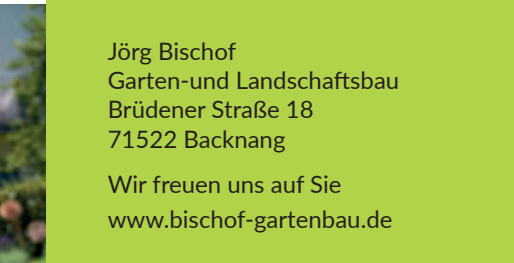

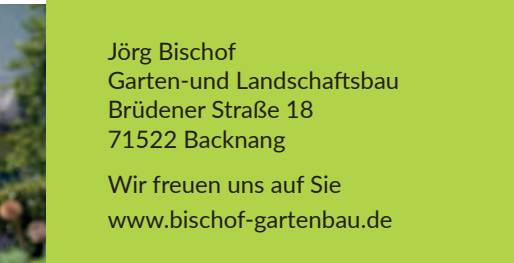

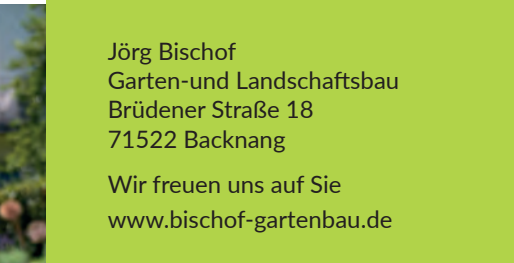

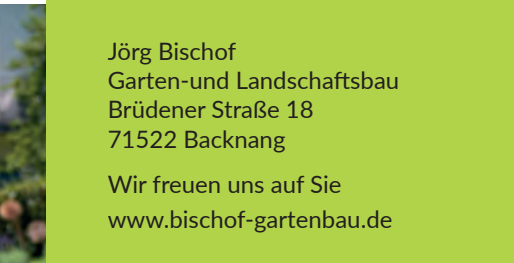

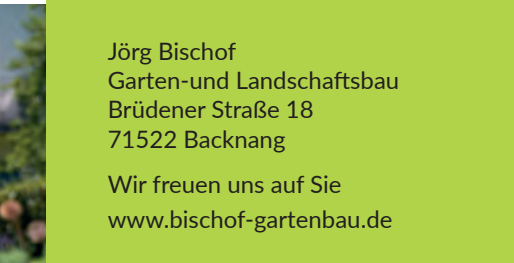

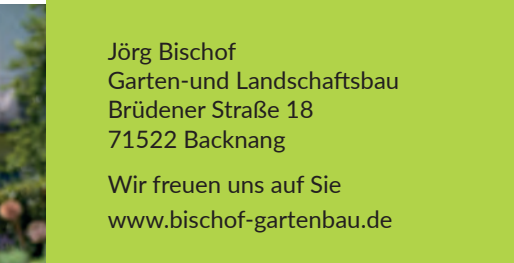

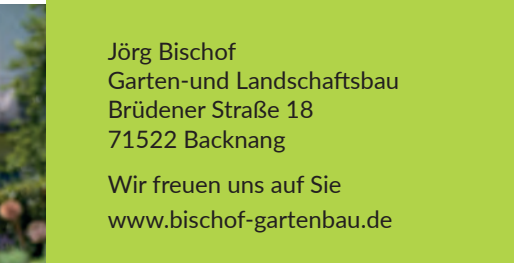

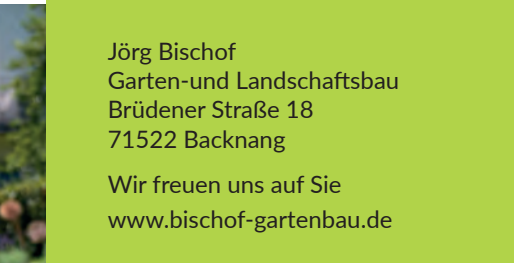

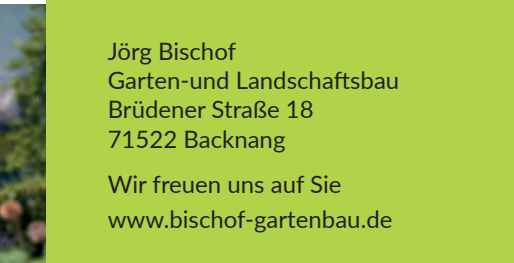

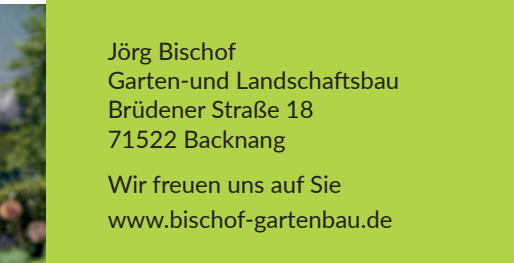

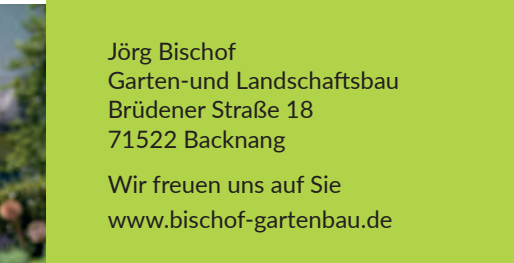

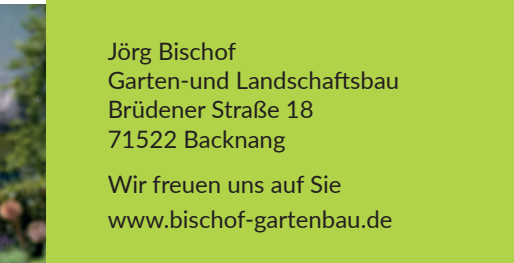

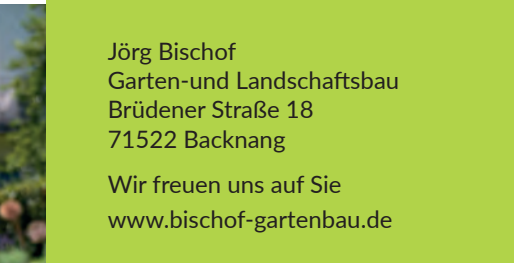

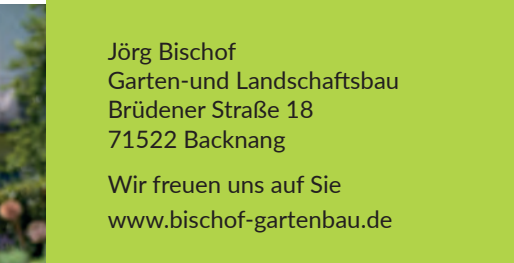

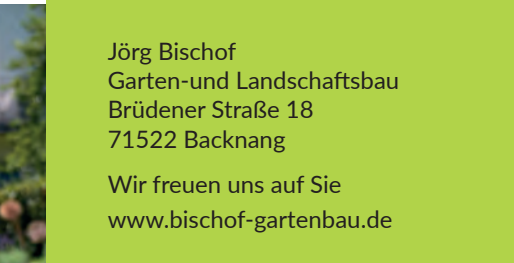

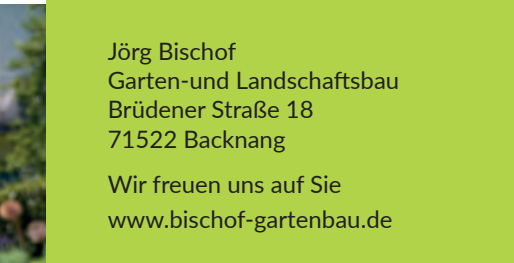

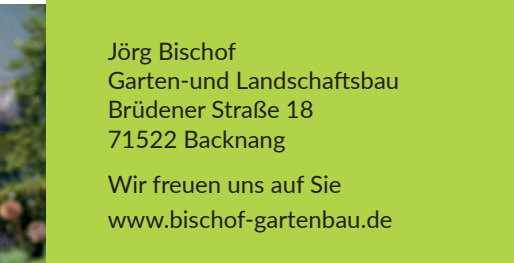

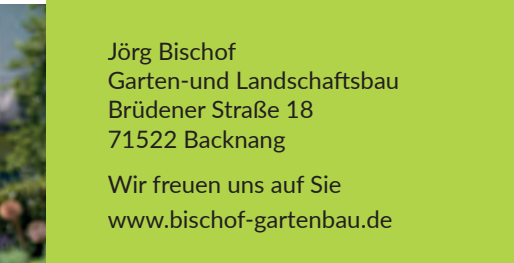

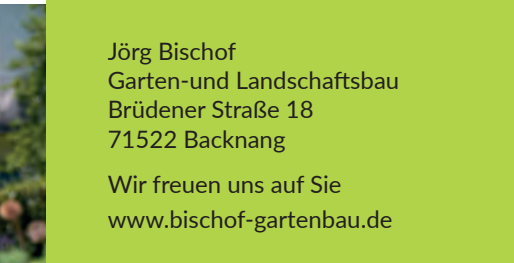

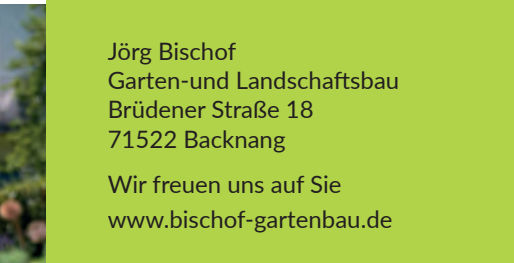

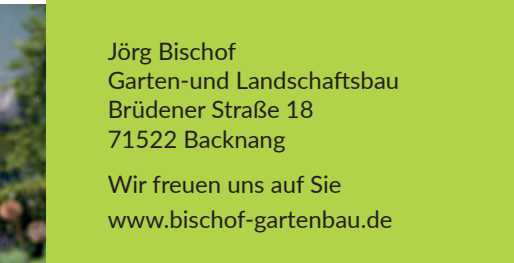

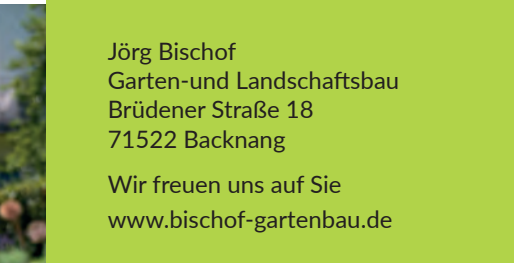

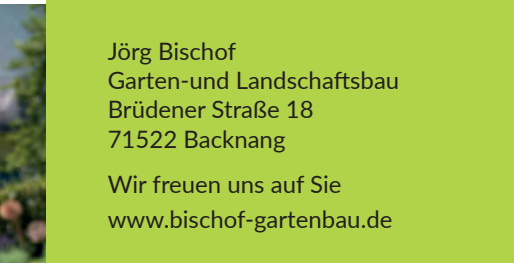

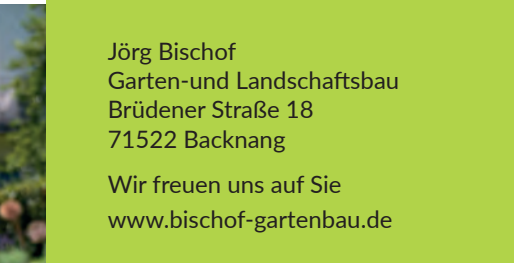

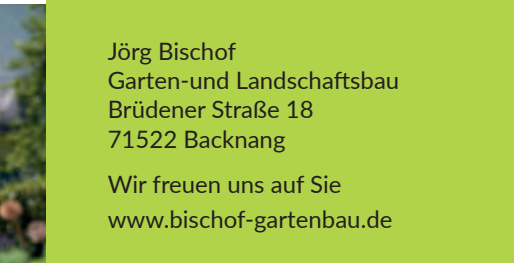

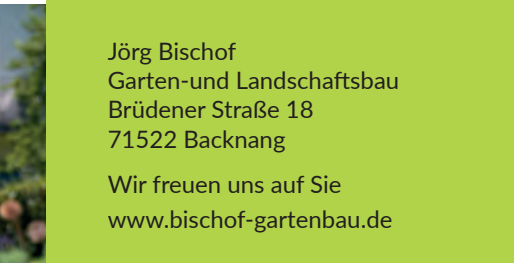

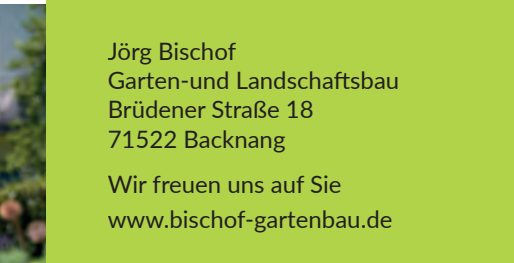

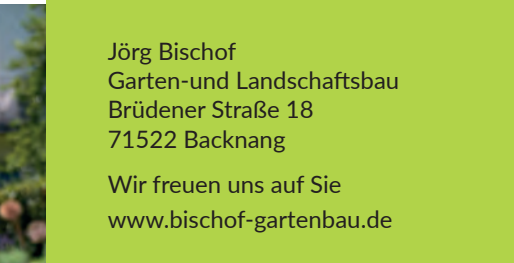

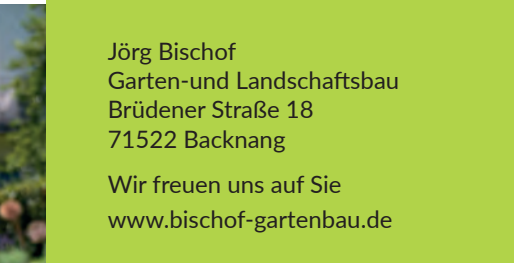

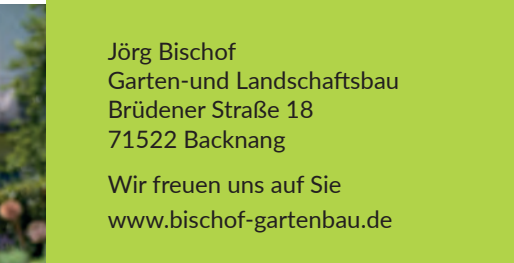

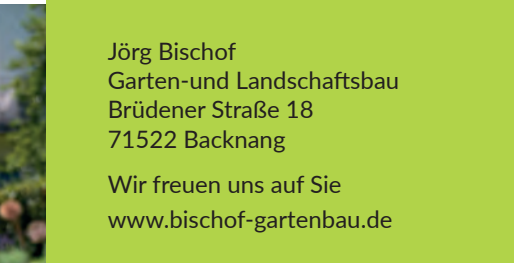

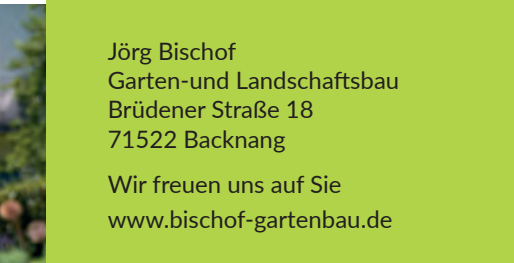

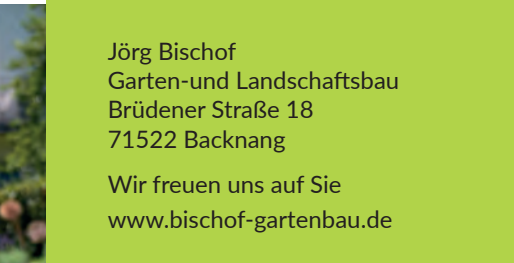

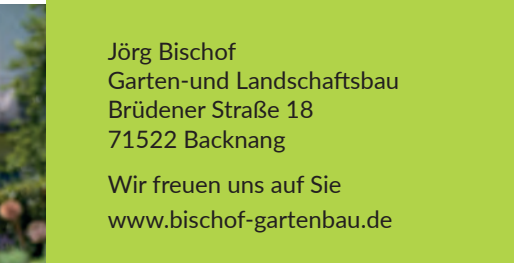

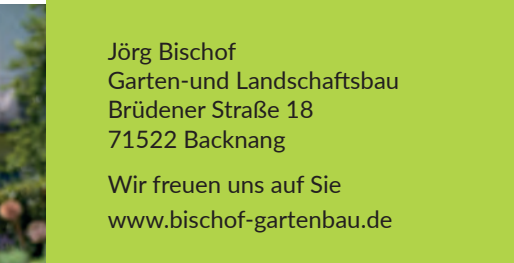

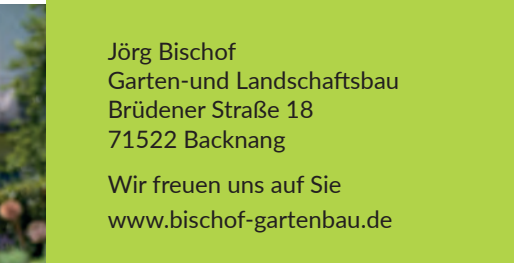

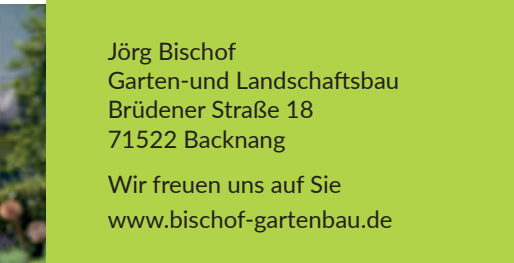

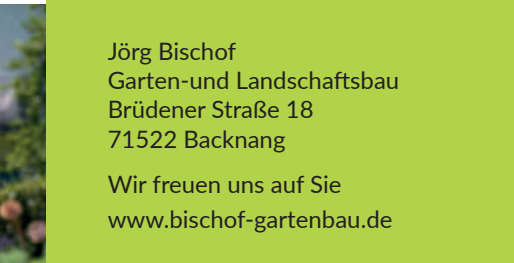

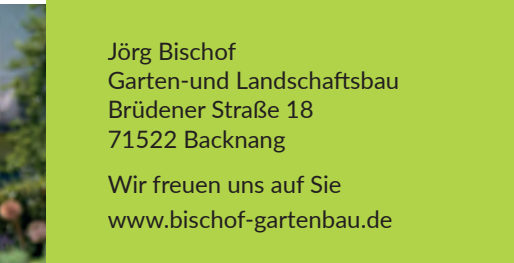

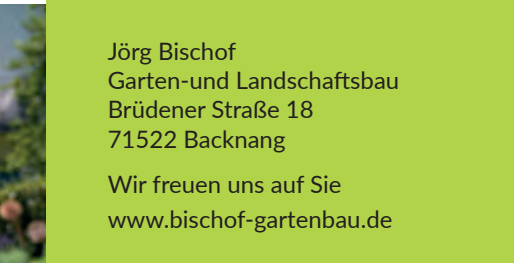

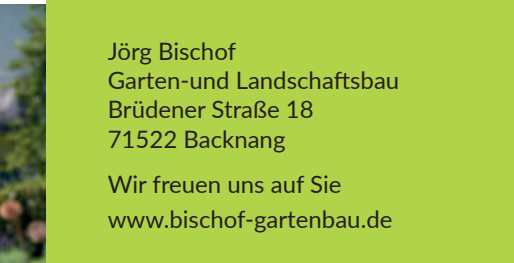

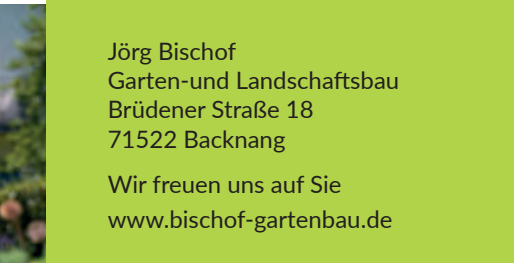

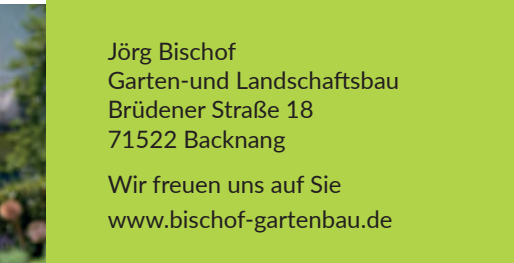

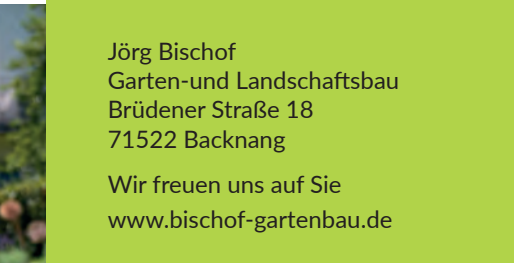

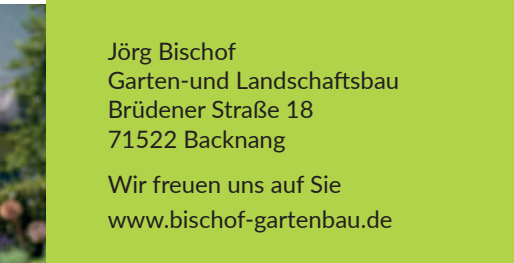

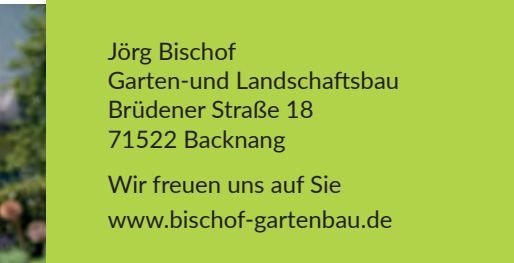

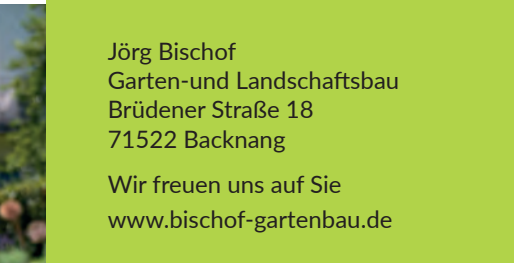

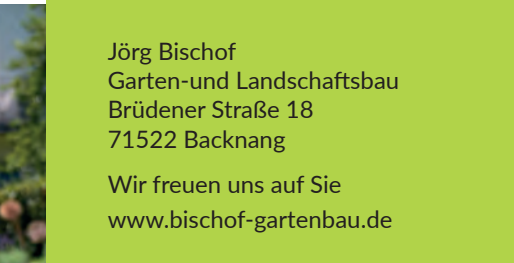

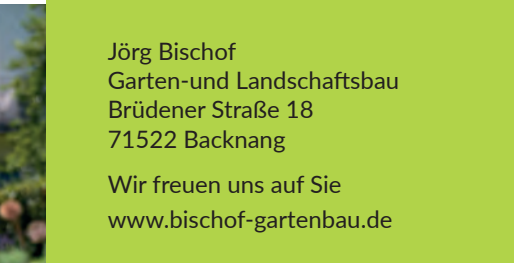

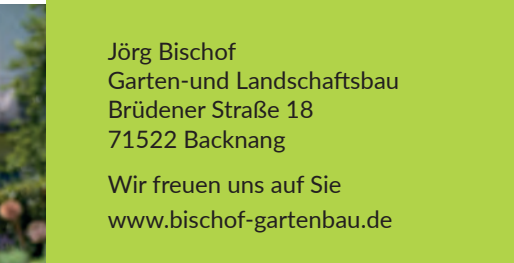

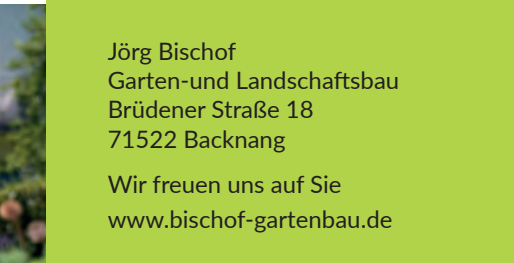

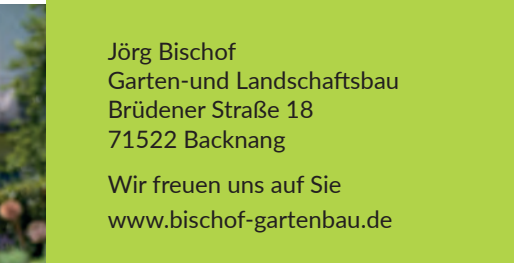

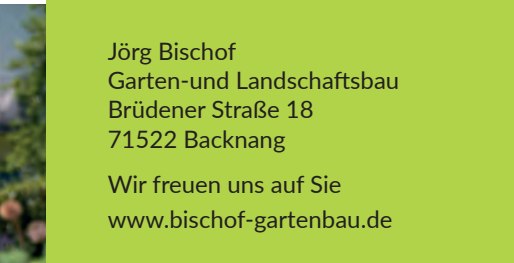

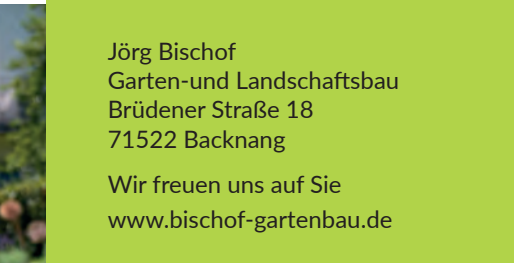

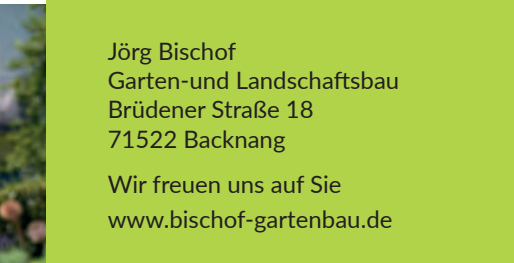

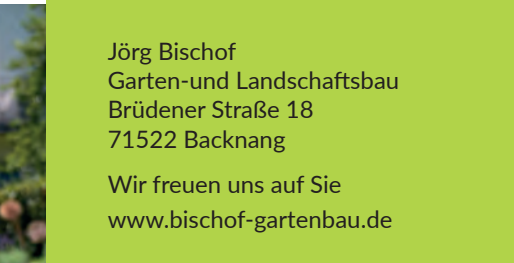

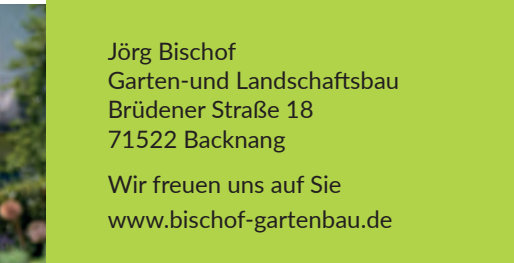

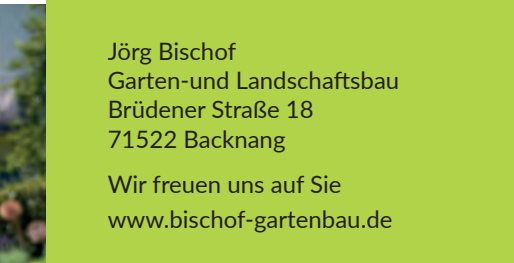

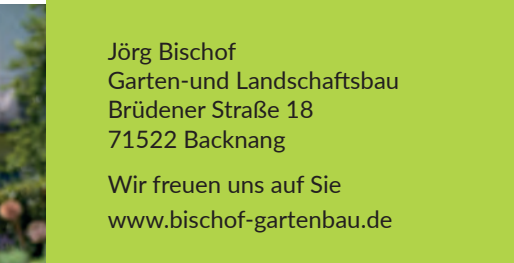

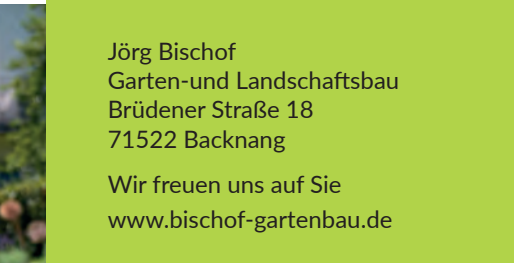

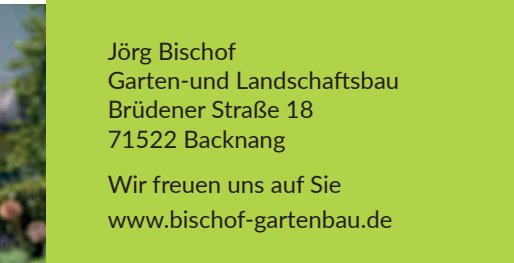

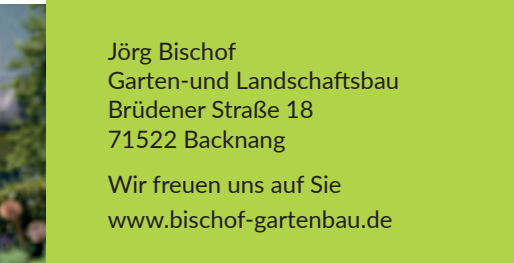

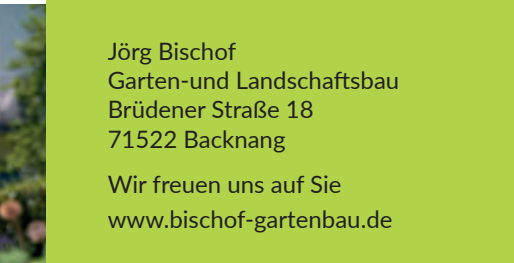

Kostenneutraler Betrieb durch umweltfreundliche Technik

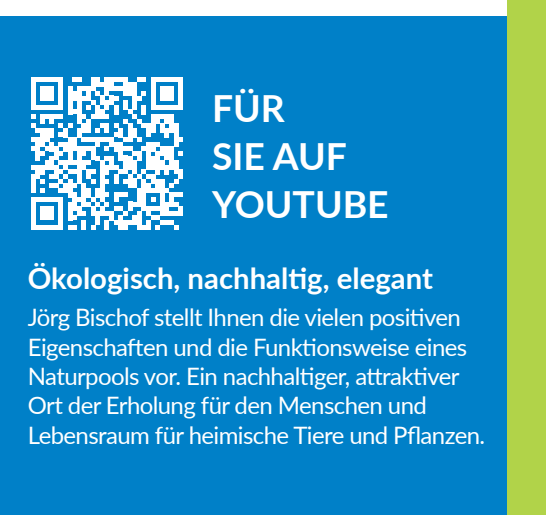

Die für die Wasserzirkulation eingesetzten Niedervoltpumpen werden durch ein Balkonkraftwerk autark mit Energie versorgt.

Ihr naturnaher Erholungsraum mit zeitloser Eleganz

Ein Naturpool ist eine großartige Möglichkeit für Sie, die Vorteile eines Schwimmbeckens mit der Schönheit der Natur zu verbinden.

Ökologisch, nachhaltig, elegant

Jörg Bischof stellt Ihnen die vielen positiven Eigenschaften und die Funktionsweise eines Naturpools vor. Ein nachhaltiger, attraktiver Ort der Erholung für den Menschen und Lebensraum für heimische Tiere und Pflanzen.

Von uns erstellte Naturpools unterteilen sich in das Herzstück, ein separates Biofilterbecken und einen anschließenden Schwimmbereich mit Bepflanzung.

„Ein Naturpool kann in jeden Garten integriert werden, wenn das Verhältnis zwischen Schwimmbereich und Biofilterbecken stimmig ist“

Jörg Bischof

MINERALISCHES BIOFILTERBECKEN

Die Reinigung des Naturpools erfolgt über die Bindung von Mikroorganismen in einem separaten Biofilterbecken. Es werden keinerlei chemische Zusätze benötigt.

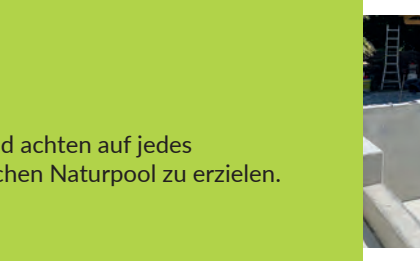

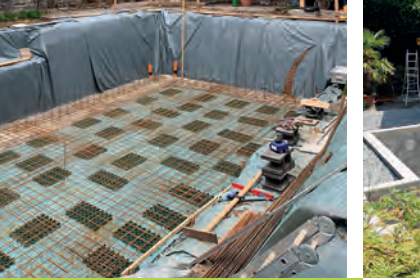

SCHWIMMBEREICH MIT TRINKWASSERQUALITÄT

Die einmalige Befüllung des Naturpools erfolgt durch Leitungswasser, welches enthärtet wird. Durch den mineralischen Reinigungsprozess bleibt dauerhaft natürlich weiches Wasser in Trinkwasserqualität erhalten.

NATÜRLICHER LEBENSRAUM FÜR TIERE UND PFLANZEN

Insekten wie Libellen, Vögel wie die Bachstelze und viele weitere Arten werden sich in und um den Naturpool ansiedeln. Dies fördert die Biodiversität und schafft ein harmonisches Ökosystem in Ihrem Garten.

WIE EIN NATURPOOL ENTSTEHT

Wir legen großen Wert auf einen perfekten Arbeitsablauf und achten auf jedes kleinste Detail, um ein optimales Ergebnis für Ihren persönlichen Naturpool zu erzielen.
